

Installation Tips

- Uses for CertainTeed Composite Trim:
 - windows and door surrounds
 - corners – rake boards – fascias
 - other decorative elements

Not for use for load-bearing applications.

- For window and door trim, miter or square-cut boards and join them in contact with each other
- At corners, leave 1/4" at top and bottom of the wall. Butt joints can contact the trim, and all joints should be caulked
- Keep CertainTeed Composite Trim a minimum of 1/2" above grade or concrete
- Cut edges should be primed with a tannin-blocking acrylic latex primer for best paint performance
- Fasteners:
 - Must be corrosion-resistant, galvanized or stainless
 - Should penetrate 1-1/4" into solid substrate
 - Must be placed no closer than 1/4" from product edge
 - May be installed with pneumatic nailer or by hand-nailing

CertainTeed Composite Trim. It's available wherever you purchase WeatherBoards™ FiberCement Siding.

Get the Look of Wood with the Benefits of Composite Technology

Textured Side

Smooth Side

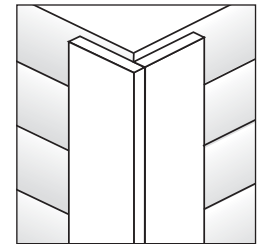

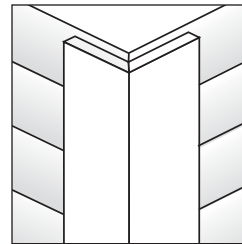

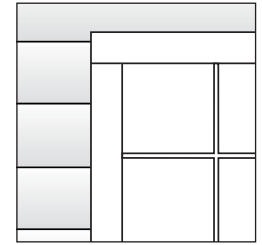

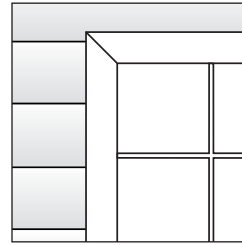

Replace wood in almost any trim area using CertainTeed Composite Trim. It is ideal for multiple uses in new construction and remodeling, and is compatible with fiber cement siding and virtually all other cladding materials.

CertainTeed Composite Trim features:

- Reversible – woodgrain/smooth
- Cuts, drills, shapes, glues, screws, nails and paints like wood
- Lighter and easier to handle than competitive fiber cement trim
- Will not rot, delaminate, warp, crack or split
- Cut edges will not absorb excessive moisture like competitive trim products
- Impervious to wood-boring insects
- Class 1 Fire Rating
- Resistant to UV rays and salt spray
- Low maintenance
- 20-year limited warranty

Two Sizes and Two Sides!

CertainTeed Composite Trim is available in two sizes, nominal 1" x 4" and 1" x 6", both in 12-foot lengths.* One side is smooth, the other side has a realistic deep woodgrain finish. Trim is sealed with specially formulated FiberTect®-TR, our proprietary FiberTect® Sealing System modified for use on Composite Trim.

Outstanding Versatility

Use stable, long-lasting CertainTeed Composite Trim for exterior corners, window trim, door trim and wherever wood trim might be installed.

* Actual sizes are 7/8" x 3-1/2" x 12' and 7/8" x 5-1/2" x 12', respectively.
